EDUCATION

Manhattan College, New York, NY, GPA: 3.86 August 2019 - May 2023
Bachelor of Science in Computer Science, Phi Beta Kappa, Magna Cum Laude, Epsilon Sigma Pi, Dean's List

RELEVANT COURSEWORK

Data Structures & Algorithms, Database Systems I, Operating Systems, Computer Organization, Systems Programming, Object Oriented Design with Java, Computer Networks, Software Engineering, Web Programming, Data Mining, Cloud Computing & Virtualization, Python Programming, Artificial Intelligence

EXPERIENCE

Democracy at Work New York, NY September 2024 - Present
Chief Technology Officer
- Developed a Flask Python app that makes content creation more accessible for company members by leveraging OpenAI for captioning and text generation.
- Organize and coordinate efforts of volunteers, ensuring efficient operations and maximizing productivity.
- Develop and implement technical strategies aligned with organizational goals to drive continuous improvement.

Democracy at Work New York, NY May 2023 - September 2024
Creative Technology Specialist
- Maintain and remodel the company website using Nationbuilder, ensuring accurate and up-to-date content using HTML, CSS, and JavaScript.
- Design and customize a new company website using the Django framework, MySQL database, and AWS for email blasts.
- Provide technical support and effectively troubleshoot website issues to ensure seamless functionality.
- Collaborate with the supervisor to address daily technology challenges and implement solutions.

Manhattan College Riverdale, NY August 2022 - May 2023
Center for Academic Success, Tutor
- Guided training in courses including Object-oriented Design in Java, Web Programming, Systems Programming, Calculus, and Computational Linear Algebra for Computer Scientists.
- Trained students in languages such as C++, Java, HTML, CSS, PHP.

Manhattan College Riverdale, NY June 2022 - October 2022
School of Science, Research Scholar
- Employed shell scripting in a Linux environment for virtualization.
- Tested hardware performance and monitored system calls on virtual machines.
- Developed an AWK script for predicting application types based on system call patterns.

ACADEMIC PROJECTS

License Plate Recognition System github.com/umasshia/capstone-backend January 2023 - May 2023
- Implemented a full-stack application using React, Node.js, and MySQL.
- Developed a Python script for motion detection and license plate recognition.
- Connected the backend to check license plates against the database and relay information to the front end.
- Designed the frontend to display database tables and logs, with search capabilities.
- Applied Scrum practices with regular sprint meetings to ensure timely delivery of high-quality software.

SKILLS

Languages: C, C++, C#, Java, Python, R, Bash, AWK, HTML, CSS, SCSS, JavaScript, TypeScript
Frameworks: React.js, Django, .NET, Flask
Databases: MySQL, NoSQL, SQLite
Cloud Services: AWS, Firebase
Other: Node.js, JSON, REST APIs, VMs, Git, Figma
